Business type Technology

Mission / Vision: Powering the re-imagination of healthcare through technology innovation and connected care

Additional information about Citus Health

CitusHealth offers home infusion and specialty pharmacies, as well as home health and hospice organizations, a single digital platform on which all forms of collaboration can occur securely and in real-time, making high-quality care more accessible and efficient. We are transforming the way thousands of patients, family caregivers, physicians, pharmacists, community service providers and care teams engage with each other every day.

This all from a vision from our co-founder and president, Melissa Kozak, BSN, RN. As a post-acute nurse, Melissa saw first-hand the communication and care coordination challenges connecting front line clinical teams with patients, field staff and partners in home-based care. She also recognized that providers were relying on manual processes to communicate and deliver care, causing inefficiencies and decreasing quality of care. Melissa teamed up with a leading healthcare technologist and founded CitusHealth in 2016 to tackle these challenges head on by providing secure solutions that support a high level of care team coordination and family engagement.
