Optum Frontier Therapies

Company Name

Optum Frontier Therapies

Locations

Two locations: Las Vegas, Nevada, and Flint, Michigan

Number of employees

103

Business type

We are a health care services business that focuses on orphan, rare disease and cell and gene therapy. We provide commercial services, wholesale and third-party logistics distribution and specialty pharmacy care services.

Mission

We are singularly focused on serving the rare disease market. Acting as an advocate, we listen directly to the patients and caregivers that we serve, partner collaboratively with their clinical care team, and educate stakeholders who participate in supporting care delivery and therapy access. It is our mission to create access to therapies at the frontier of health care and to help all people, no matter how unique, access a better tomorrow.

Additional information about Optum Frontier Therapies

Optum Frontier Therapies is an independent, mission-driven health care services business. We are continually evolving our services and capabilities — well beyond those of a traditional specialty pharmacy — to better serve rare disease stakeholders including patients and caregivers, physicians and offices, pharmaceutical partners and payers. Through our three distinct lines of business — specialty pharmacy and patient services, ultra-specialized distribution, and commercial services — we are:

- Combining holistic, patient-first care and clinical expertise to streamline access and improve outcomes
- Integrating precision-focused distribution capabilities to eliminate therapy delays and reduce waste within the ecosystem
- Collecting and analyzing detailed and longitudinal data to demonstrate the value of therapy and enable data-driven decisions

We didn't get here by chance. As high unmet needs continued to persist within the rare disease community, we knew there was an opportunity to use our deep clinical expertise, partnerships, data, insights and desire to do better to fundamentally change the way stakeholders approach rare disease. We conducted extensive market and clinical research, as well as direct stakeholder interviews, to pinpoint what was missing and identify opportunities to drive better outcomes and experiences for those we serve.

Our model, services and capabilities are designed specifically to address the complex challenges within the rare disease community. We have been awarded the URAC® Rare Disease Pharmacy Center of Excellence designation and an Accreditation Commission for Health Care (ACHC) Distinction in Orphan Drugs, which denotes a high level of clinical service. In addition, we offer:

- Clinical pharmacists who serve as an integral part of the patient's care team, proactively delivering clinically centered, holistic care services whenever and wherever needed to support their unique journey
- Care ambassadors who serve as the quarterback for patients and their physicians, coordinating care across multidisciplinary care teams and enabling end-to-end patient journey visibility
- A full suite of rare disease-focused services, powered by deep clinical expertise and robust data and analytics, that deliver streamlined experiences and simplify how patients and physicians interact with the health care system
- Actionable, real-time data that drives financial transparency, demonstrates therapy results in real world and economic terms and helps support innovative payment models that improve access to therapy and lower the total cost of care

We are more than just a specialty pharmacy — we have engineered a fabric across stakeholders to better facilitate rare care. There are no limits to the solutions our compassionate, expert staff can offer to the rare disease community.
